### DETAILED ACTION

1. Applicant's election of the Group I invention is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The proposed drawing correction is approved. New formal drawing is required.

3. Claims 1,2,4-9,13,15,20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blackwell et al (5,152,819) in view of Flamenbaum et al (3,806,570) and Roba et al (6,672,110)

In addition to the reasons given in the previous Office Action, mailed 9/15/2003, the following is noted in regard to the new limitations:

The fact that Blackwell et al forms a porous soot body prior to sintering and consolidating the soot into glass (column 9), it is inherent that the soot is deposited below the minimum temperature that the soot particles are consolidated otherwise fused glass would be formed instead of a soot preform. In any case, Roba et al teaches that it is advantageous that the temperature of the soot perform during soot deposition be at a temperature of between 700 and 1200 °C (see column 10), a temperature range within the disclosed and claimed range.

4. Applicant's arguments have been considered but are deemed unpersuasive of patentability for reasons given above.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1731

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
